	Urgent	Not Urgent
Important	• Show current Indianapolis and India time side by side. • Store availability windows for both of us (including classes, sleep, work etc.) • Get a yes or no if it is a good time to call, with specified reasons.	• Have different schedules for weekends and weekdays. • Windows notifications when a window opens. • Call logs using the tool + a streak display. • Having a file which can edit schedules without me touching code again and again.
Not Important	• Time-zone conversion and daylight-saving shifts: java.time with ZoneId (JAVA) • Desktop notifications: BurnToast on Windows (PowerShell) • Terminal colors and layout:ANSI escape codes or Lanterna (JAVA)	• Auto-starting a WhatsApp call when the window opens. • Analytics to maybe auto-schedule future calls. • Weather/festival system for her city to mark unavailable days.
